SERIES OF WINTER SPORTS.

How the Young People of Switzerland Amuse Themselves in the Snow.

"Winter Sports in Switzerland" is the title of a series of pictures which will be shown in the Lyman H. Howe exhibition in Barre opera house on Friday night, Sept. 11. It is a decidedly interesting series.

First of all there is a battle with snow balls, the opposing armies of boys endeavoring to drive each other away. A Ski Jumping Carnival is something new. It shows the young people jumping great distances with the aid of long poles, something on the hurdle order. Many of them miss their footing and tumble and roll about in the snow, performing all sorts of gymnastics. A novel coasting scene is also shown, the coasters attempting to round a sharp curve while going at full speed. There are some ludicrous "spills," to be sure. A dangerous pastime, that of coasting at great speed down a hill and allowing the sled to go over a high board into space thrills the spectator. Many coasters are injured in this way. The series was secured by Mr. Hot at great expense.

PUBLIC NOTICE.

Parties living in the vicinity of street lamps are requested to take notice of the rights that the lights do not burn and thereby assist the lighting committee in procuring the best possible service.

Parties doing this will confer a favor by leaving a slip with the chief of police, the city clerk or any member of the board. Postal cards for this purpose may be procured from the city clerk.

John J. MacKenzie, Chairman Lighting Committee. Barre, Sept. 2d, 1903.

STATE LINES.

Free diphtheria antitoxin and vaccine virus are to be furnished the people of Massachusetts by its state board of health.

"The continuous drilling in Ohio for oil and gas and the consequent raising of the gas to the coal surface is and will be a source of very great danger in coal mining for years to come," says State Inspector Hisselton of Ohio.

Kansas has seven living ex-governors. One has a well paying job on the Dawes commission, one has gone into insurance, one has an agency for an Alaskan immigration concern, one is practicing law, one has turned his attention to banking and two are farming.

Spinach.

Prominent specialists claim that spinach is the most precious of vegetables on account of its medicinal and strengthening properties. The emollient and laxative virtues of spinach, owing probably to the salts of potash it contains, have been long known.

Decoding Oysters.

Scallops and small oysters can be easily crumbed by spreading the sifted crumbs on a sheet of stout paper, dropping the oyster food into them and tossing them carefully by lifting the paper at either end.
